What is this product?

Type

This product is a share in a sub-fund of the investment company with variable capital ECONOPOLIS FUNDS, an undertaking for collective investment in transferable securities (UCITS) under Luxembourg law.

Term

This sub-fund has no maturity date. However, the board of directors of the fund may decide to close the sub-fund under certain circumstances.

Objectives

The sub-fund's objective is to offer its shareholders long-term capital gains. This objective will be pursued by investing the assets of the sub-fund in fixed income instruments, as well as cash or similar instruments and without geographical limitation. At least 51% of the assets of the sub-fund will be invested in emerging economies without sector or currency restrictions.

The sub-fund aims to generate return from current income and capital appreciation by investing into fixed income securities that have been actively selected by the Investment Manager. The selection will predominantly (i.e. at least 80% of the bond portfolio) include instruments issued by governments, government agencies, supranational bodies and/or government guaranteed issues. The sub-fund is allowed, to a limited extent (i.e. not more than 20% of the bond portfolio) to invest in fixed income instruments issued by corporate entities or other private sector entities that do not benefit from an explicit government guarantee. The sub-fund has the ability to invest in fixed income securities that are issued in local emerging market currencies or fixed income securities that are issued in non-emerging market currencies, with no restriction. The sub-fund's neutral investment universe is a combination of a 30% hard currency EM bonds and 70% EM Local currency bonds. Maximum weight per issuing country is capped at 15% of the sub-fund's net assets.

The sub-fund is managed actively and will invest in securities based upon macro-economic analysis, specific issuer's analysis, political analysis, valuations and / or other considerations the investment manager deems appropriate. At least half of the bond portfolio will be invested in investment grade credit at the time of purchase of the relevant fixed income instruments. The rating will be defined based on the highest rating by one of the Big Three rating agencies. In the case where the bonds issues have no rating, the rating of the issuer itself will be used, if available.

The sub-fund may also invest up to 20% of its assets in perpetual bonds.

In an ancillary manner, up to 20% of its assets, the sub-fund may hold cash deposits at sight.

The sub-fund may, subject to the limits defined by law, invest in financial derivative products, including, for example, futures, options, forward exchange con-

tracts, credit default swaps or interest rate swaps in order to achieve the investment objectives and for risk hedging purposes.

The sub-fund promotes environmental or social characteristics. For this sub-fund, a sustainable investment policy is in place, which can be consulted on <http://www.econopolis.be/en/sustainability>. Additional information on sustainability is available in the prospectus of the fund.

Benchmark: The portfolio is actively managed on a discretionary basis without reference to a benchmark.

What are the risks and what could I get in return?

Risk indicator

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Be aware of currency risk. You may receive payments in a currency that differs from your reference currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: Other risk factors might exist.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

Unfavourable	What you might get back after costs	9,010 EUR	10,100 EUR
	Average return each year	-9.9%	0.2%
Moderate	What you might get back after costs	10,000 EUR	10,950 EUR
	Average return each year	0.0%	1.8%
Favourable	What you might get back after costs	11,130 EUR	12,140 EUR
	Average return each year	11.3%	4.0%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Unfavourable scenario: This type of scenario occurred for an investment between November 2024 and December 2025, by referring to a reference class.

Moderate scenario: This type of scenario occurred for an investment between February 2016 and February 2021, by referring to a benchmark and to a reference class.

Favourable scenario: This type of scenario occurred for an investment between March 2020 and March 2025, by referring to a benchmark and to a reference class.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if BLI – Banque de Luxembourg Investments, acting under the commercial name Conventum Third Party Solutions is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation or guarantee scheme. To protect you, the assets are held with a separate company, the depositary Banque de Luxembourg. Should we default, the investments are liquidated and the proceeds are distributed to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding period we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	457 EUR	1,233 EUR
Annual cost impact (*)	4.6%	2.2% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4.1% before costs and 1.8% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
